ICLAS Funding is Available for Educational Activities

Funds allocated for activities in 2020 can be held for 2021 if the funded activities were postponed because of the pandemic. Please communicate with your Regional Committee about changed plans. The application for funding does not need to be re-submitted. Contact info@iclasm.org with questions.

ICLAS is calling for requests for funding applications for laboratory animal science initiatives for 2021. The form to request funding is found on the ICLAS website here:

The ICLAS Governing Board will meet October 23 and 24, 2020 to consider these funding requests. The deadline to submit requests is September 7, 2020.

ICLAS supports programmes and activities that benefit the largest possible audience within each region of the world (Africa, Asia, Americas, Europe, Oceania). These funded activities most often involve educational resources, scientific meetings, skills training, classes, or educational technologies. The amount of funding awarded is typically €2000, though requests for larger amounts of funding are considered for initiatives that have great impact. Please reach out to your Regional Committee about this funding program. In general, the more individuals who can benefit from an initiative, the more likely funding will be awarded. For example, a request for an expert to provide training to a large audience is more likely to receive funding than would a request to send one person to attend a training session.

Funding applications must be submitted to the ICLAS Regional Committee Chair(s). The Regional Committee will determine if a proposal is appropriate and has merit. The Regional Committee Chair(s) will endorse and submit the proposal and supporting documents to the Governing Board for review and approval at the next Governing Board meeting.

The ICLAS Governing Board meeting for 2020 will be held October 23 and 24. The General Assembly will be on October 25. More details about these sessions will be provided in July.

The Federation of Hispanic Associations and Societies of Laboratory Animal Science of North America, Central America, and the Caribbean (FESAHANCCCAL) journal is available in their website www.revistafesahancccal.org. All the published volumes are freely available.
